

## **AWARD PAPER**

|                                                                                                                                                                                                                              |                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| 1. A Cross- sectional study to identify personality traits amongst psoriasis patients and Vitiligo Patients                                                                                                                  | Dr. Sakshi Sah            |
| 2. A comparative study on clinical efficacy of Topical Tofacitinib 2% cream versus Topical Calcipotriol 0.005% ointment in the treatment of Alopecia Areata                                                                  | Dr. Neha Khan             |
| 3. Role of MIP Vaccine in the Management of Severe/Recalcitrant ENL : A Retrospective Observational Study in a Tertiary care Hospital                                                                                        | Dr. Rohit Kumar Singh     |
| 4. Comparative Evaluation of Triple Intralesional Therapy versus Triamcinolone with Fractional CO <sub>2</sub> Laser in Keloid Management: A Prospective Study                                                               | Dr. Akash Gupta           |
| 5. Efficacy and safety of Rituximab vs Methylprednisolone pulse in patients of Systemic Lupus Erythematosus and Lupus Nephritis: A tertiary care centre experience in Eastern India                                          | Dr. Kaushiki Suman        |
| 6. A Comparative Study on the Efficacy and Safety of Isotretinoin versus Colchicine in Lichen Planus Pigmentosus                                                                                                             | Dr. Vinayak Upadhyay      |
| 7. Efficacy And Safety Of CO <sub>2</sub> Laser Vs Subcision With Platelet Rich Plasma In Patients With Atrophic Acne Scar: A Comparative Study                                                                              | Dr. Kumari Priya          |
| 8. Optimizing Alopecia Areata Treatment: Microneedling-Assisted Tofacitinib vs Methotrexate Therapy                                                                                                                          | Dr. Shubham Mittal        |
| 9. Efficacy and Safety of Q-Switched Nd-YAG Laser in stable and Recalcitrant Lichen Planus Pigmentosus                                                                                                                       | Dr. Pooja Singh           |
| 10. A COMPARATIVE STUDY OF 32 CASES OF ALOPECIA AREATA TREATED WITH MIRCONEEDLING WITH TOPICAL HALOBETASOL PROPIONATE 0.05% OINTMENT VERSUS TOPICAL HALOBETASOL 0.05% OINTMENT PERSE WITH SEQUENTIAL TRICHOSCOPIC EVALUATION | Dr. Preksha Jinwala Arora |

|                                                                                                                            |                   |
|----------------------------------------------------------------------------------------------------------------------------|-------------------|
| 11. Differential Hormonal and Metabolic Signatures in Adult-Onset and Adolescent Acne: A Comparative Diagnostic Evaluation | Dr Sanjeevan kaur |
|----------------------------------------------------------------------------------------------------------------------------|-------------------|
